

How to create your account

Anyone can look around the auction. You only need an account when you want to **place a bid**. It takes about a minute.

1 Open the auction

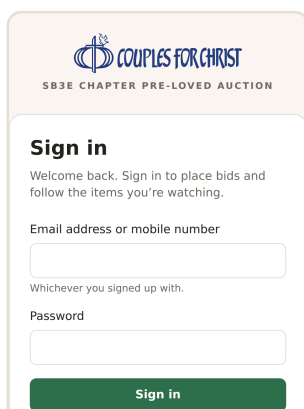

Type the address above into any browser on your phone.

RAISED SO FAR
₱1,850 of ₱50,000 goal 4%

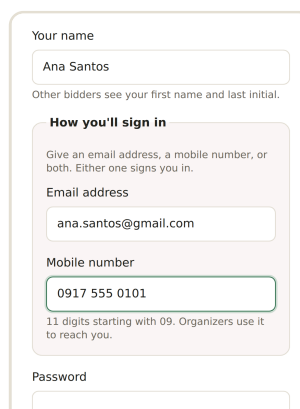

2 Tap "Create an account"

It sits just under the **Sign in** button.

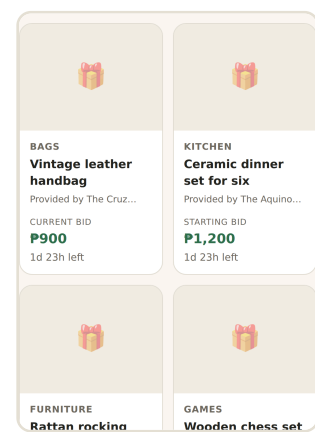

3 Say how to reach you

Your name, then an email address or a mobile number — or both.

4 Pick a password, and you're in

Eight characters or more, typed twice. Then start bidding.

An email address, a mobile number, or both

Either one signs you in. What differs is whether the auction can reach you.

● With an email address

- ✓ We email you the moment someone outbids you
- ✓ You get a notice if you win, with how to pay
- ✓ You can reset your own password any time

● With a number only

- ✗ You can bid perfectly well — but nothing will chase you
- ✗ Check the auction yourself so you don't miss the close
- ✗ Add an email later from **My bids** and the alerts start

Your name stays private

Other bidders only ever see your first name and last initial — never your email or number.

Forgot your password?

Tap **Forgot your password?** on the sign-in page. Signed up with a number? Enter it and say where to send the link — an organizer checks it first.

Add your mobile number

It is how organizers reach you about payment and pickup if you win an item.

Scan to open the auction

Point your phone's camera at the square. Or type cfc-sb3e-auctions.vercel.app into any browser.

Stuck on any of this? Ask a chapter organizer — that is what we are here for.
