

FOR THE TREASURER

Collecting what was raised

The app records who won what. Turning that into money in the chapter's hands is yours, and so is the console on live auction night.

1 Open Winners & payments

Every sold item, its winner, and how to reach them. Filter to **Unpaid** to see what is outstanding.

Winners & payments

3 winners · ₱1,850 won · ₱650 collected

Mark collected

Cast iron frying pan

₱950

3 Run the console on the night

The auctioneer calls the room; you record each bid and tap **Sold**. Keeping the record is a two-person job for a reason.

Antique narra dining table

₱5,500

₱6,000

What the treasurer role can and cannot do

Enough to settle up and to run the finale — and nothing that could alter what was sold.

You can

- ✓ See every winner, their bid and their contact details
- ✓ Mark payments received and items collected
- ✓ Download the CSV, and run the live auction console

You cannot

- ✗ Add, edit or withdraw items
- ✗ Open, close or create an auction
- ✗ Change what anyone else is allowed to do

Marking paid emails nobody

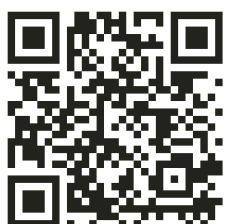

It is a record for the chapter, not a receipt. Thank people yourself — it lands better anyway.

The CSV is the chapter's copy

Download CSV gives every winner, amount and status in one file for the chapter's records.

Winners without an email

Somebody who signed up with a mobile number only shows their number instead. Ring them — they will not have been emailed.

Scan to open the auction

Sign in and go to **Winners & payments**. On the night, **Live auction** is the console.

Rehearse the console once before the night — fifteen minutes with the auctioneer is enough.
